

iDashboards Version 7.5 is redefining the dashboard experience with stunning presentation options, an expanded chart library, interface enhancements and new dashboard development features. Build dashboards like never before and captivate your users with an innovative solution, providing insight into your data through the use of dynamic presentation options. WHAT'S NEW IN IDASHBOARDS V7.5:

PRESENTATION CHARTS

- Slideshow – View a single image at a time with the ability to play, pause, skip forward or backward all while iDashboards' patented interactive intelligence is in effect
- ViFrame – Display information with a GUI or HTML editor, information dynamically changes based on other charts displayed within a dashboard
- Image Gallery – Showcase multiple images by columns, rows or specified number of images

UPDATED AND NEW CHART TYPES

- Gradient option
- Multi-needle Speedometer Chart
- Target Metrics
- Many new country maps

BACKGROUND IMAGES FOR CHARTS

- Utilize an image as a chart and/or dashboard background

NEW INTERFACE ENHANCEMENTS

- Recently Viewed Dashboard List – Display the last 10 dashboards opened by the user
- Manage Content Directories – Administrators are able to manage content with folders and subfolders
- Additional Map Display Options – Turn on or off cell labels and X/Y value text
- Category List Style Set on a Per-User Basis – View list of dashboards as categories or dropdown list

NEW DASHBOARD DEVELOPMENT FEATURES

- Dynamic Picklists – Automatically populate input parameters and stay up to date with the data
- Drilldown Data Diagnostics – Enhanced chart detail/structure reporting
- Date/Time Control – Set input parameters for date and time down to the second
- Pre-defined date formats in chart properties – Easily format date view with pre-defined formats
- Secure encrypted email – System setting in alert console for secure encrypted email alert using TLS and SSL
